

AEL

airLOGIC[®] Calf Panel

Calf Panels are designed to prevent the legs from slipping behind the footplates. The panel fits most chair widths with easy to adjust Velcro straps.

Now available in AEL's exclusive AirLogic technology! AirLogic technology is a series of breathable fabrics and structural layers that maximizes air movement.

- Air movement promotes a dry and comfortable fit
- Breathable fabrics accelerate air movement under and through the panel
- Air mesh enables perspiration to pass through the mesh before it condenses, keeping users cool and dry
- Machine washable & quick drying

AirLogic[®] Calf Panel
